

# Chloe Ng

A software engineer with design experience seeking a position in a fast-paced environment where she can learn and grow with the company.

## EXPERIENCE

### **GIBLIB** — *Frontend Software Engineer*

June 2020 - July 2022

Built a new video-on-demand learning platform app from ground up within 6 months and iOS app in 3 months. Designed and developed platform analytics for data driven features to enhance users learning experience. Mentored and onboarded junior developers to the platform and led collaboration between engineers and subject matter experts.

### **AstroReality** — *Software Engineer*

October 2019 - December 2020

Created new features on augmented reality Unity app using C# and styled frontend. Improved and stabilized video view for more precise markers in app. Developed and managed a custom shopify website and set up a design system using Javascript, HTML, CSS, and Liquid. Adjusted web experience based on user flow data. Developed emails based on marketing campaigns and maintained consistency throughout the website. Helped acquire 12% new customers and retained customers through ads and email pipeline.

### **Solution21** — *Website Designer, Contractor*

January 2019 - May 2019

Designed and developed websites in HTML, CSS, Javascript, WordPress, Duda. Discussed website design with clients. Examined the shortfalls of their old website to improve site experience. Helped raise their SEO score by improving site speed, keyword search, backlinking and improving user experience. Designed creative assets for websites.

### **DiagnosisAI** — *Designer and Marketer*

November 2016 - December 2019

Developed a website using React, Javascript, HTML, and CSS. Collaborated closely with software engineers to produce a live feed of the most popular medical questions people asked our medical AI chatbot. Designed the logo, graphics, websites, and interface mockups. Managed their social media accounts and wrote a press release. Partnered with a few companies including NVIDIA, IBM, and Boomtown Accelerators.

### **FoodNest** — *Web Developer / Graphic Designer*

July 2016 - November 2016

Developed the website, minimum viable product, and graphics. The minimum viable product allowed FoodNest, a European startup funded by the European Union, to be invited to selection days for a Food Sustainability accelerator.

WordPress, Google Analytics, Shopify

Figma, Illustrator, Lightroom, Photoshop, InDesign

## EDUCATION

**UC Riverside** – Business Admin, Marketing, B.S

## HACKATHONS AND PROJECT CONTINUATION

**NICK** – *Walmart Labs Hackathon*  
Won 2nd place at the hackathon. The user can search for products on this web app which lists information about the product such as its name, price, and description. Users can subscribe to products or product categories and get alerted through text when they drop below a threshold set.

## HACKATHONS AND PROJECTS

### **IdentifyAI** — *AT&T Shape Hackathon*

Won 1st place for Best Use of IBM Watson. Created a bot on Twitter where people can tweet photos with the hashtag #IdentifyAI. With the help of IBM Watson, the picture gets identified and the bot responds to the user with the name of the show, MPAA rating, and recommendations of similar shows.

### **checkphone.xyz**

Developed a Next.js application for users to check the value of their Solana Mobile phone's airdropped NFTs and cryptocurrencies like \$sol, \$bonk, \$sac and \$wen. Received over 100,000 page views in a month since launch.
